Service Descriptions

Solar Maintenance Plan Inclusions

Solar Panel Cleaning

Removal of dirt, dust, pollen, and debris from solar panels to help maximize energy production, improve efficiency, and maintain optimal system performance.

Full System Diagnostic (Panels & Inverters)

Detailed testing and inspection of solar panels and inverters to identify performance issues, equipment faults, communication errors, and production losses, helping ensure your system operates at peak efficiency.

Equipment Voltage Inspection

Inspection and testing of voltage levels throughout the solar system to verify proper operation, identify electrical issues, and ensure safe and efficient system performance.

Drone Inspection (When Applicable)

Aerial inspection using drone technology to assess panel condition, identify potential issues, and safely evaluate hard-to-reach areas without roof access.

Firmware Upgrades (When Applicable)

Updating inverter and monitoring system firmware to improve performance, reliability, security, and overall system functionality.

Quarterly Remote Monitoring Report (When Applicable)

Twice-yearly review of system performance and production data, providing insights into system health, efficiency, and any issues that may require attention.

24-Hour Response Guarantee

Guaranteed response within 24 hours of a reported issue or service request to ensure timely assessment and support.

Corrective Action Plan — Within 72 Hours

Written assessment and recommended course of action provided within 72 hours of issue identification to help restore system performance and reliability.

Discounted Service Calls

Members receive further discounted service calls at $299 per visit (regularly $499).

10-Year Workmanship Warranty on Labor

Extended coverage on all qualifying labor performed by our team for up to ten years.

Manufacturer Warranty on Parts

Parts and equipment covered by applicable manufacturer warranties.

10% Off All Labor & Parts

Members receive 10% off all labor and parts on qualifying repair and service work performed by P&S EcoSolutions.
